Mavens of London
193-197 High Holborn,
WC1V 7BD, London

Dear Mr. / Ms.,

My name is Lukas Buteliauskas and I am applying for the Developer-Digital Analytics position. I'm a recent Maths and Physics graduate from Warwick University and am currently developing my technical and non-technical skillset in the Springboard Data Science 'boot-camp'. I am particularly interested in applying data science to consumer behaviour and arriving at actionable, data driven, results and insights. I understand that this is a core component of Mavens' identity and is therefore one of the main reasons I am applying.

After finishing the boot-camp in the coming months I will have completed two personal projects that will demonstrate my acquired knowledge as well as my ability to drive a Data Science process from start to finish. Some of those skills, including work with SQL and Python (along with Numpy, Scipy, matplotlib and Pandas packages), have already been applied. You can view my work on my GitHub. All work is clearly documented and justifications for programming choices are provided. I'm also well versed in Java including its data structures and algorithms with an appreciation for core software development aspects such as Big O notation. I've also taken C modules at university and have working knowledge of JavaScript.

As an intern with Fly Victor (a private jet charter company) I contributed to a wide array of aspects of the business. My responsibilities included: using Data Analysis to find optimal private jet category pricing and communicating the findings to the co-founder, acting as the scrum master of the Data Team, teaching non-technical employees how to use Power BI (data visualisation software like Tableau or QlikView) and maintain good data practices within Salesforce (CRM software) to name but a few of them. Most of the skills I was working with I acquired during my time at Victor and did so in a very short timeframe. It was the curiosity and want to develop that led to those opportunities becoming available.

Thank you very much for your time and consideration in reviewing my application and I look forward to hearing from you.

Yours Faithfully,

Lukas Buteliauskas
